Developers

And many more...

# Chess

PUBLIC

# ▶ Chess

- Insider threats
- Cloud everything
- Automation, AI and Machine Learning
- Mobile Menace
- Expanding role of CISO
- Zero trust model

PUBLIC

# ▶ Chess

- IoT massive expansion
- Working from anywhere
- Security talent acquisition
- Nation - state activity
- Supply chain attacks
- 5G vulnerabilities
- Death by cyber attack

PUBLIC

# The Queen

# ▶ The Queen

- People
- Technology
- Procedures
- Critical assets
- Reputation
- The every day life and work of the people
- Compliance and regulations
- Check how the play is being set up now
- Think about your next moves

PUBLIC

# The Gambit

Company certified for quality and  
management systems

56

Security engineers  
and we keep growing

12+

years of innovation

Public

# ▷ The Gambit

- Technology and security do not lead to behavioural conformity.
- Learn more about what motivates behaviour.
- Commit to designing and implementing security practices and tools that work with humans rather than against them.
- Better understanding of people's behaviours to find ways to mitigate risk to organizations and organizational assets.

PUBLIC

# ▷ The Gambit

- Security by design in everything
- Secure your vendors
- Secure your products
- Secure your services
- Secure your HR procedures
- Create an open channel of communication with everyone in your company
- Create a team of infosec and non-infosec members within the company

PUBLIC

# Start your clocks

## Let's play
